

AURORA | 360

Experience the NORTHERN LIGHTS

LIKE NEVER BEFORE!

*YAT'AY K'ÄNAT'A MAZHÄN
KWATS'ÄN YAT'ÄY ÄDEK'Ä*
(Flying to the Northern Lights)

Scheduled to take-off from Whitehorse, Yukon, Canada on the weekend between the 11th and the 15th of February 2021, the Aurora | 360 Experience offers passengers an exclusive opportunity to fly above the clouds, and witness the Aurora Borealis, closer than ever before. Once airborne, the charter jet will hunt for the Auroral Oval (an oval-shaped region centered on the Earth's magnetic pole in which auroral emissions occur), and alter course, as required, to ensure passengers get the very best experience. And, with only 70 seats available, this flight comes with serious bragging rights!

The Aurora Borealis (Northern Lights) is truly one of the World's greatest celestial phenomena. A once in a lifetime experience, the groundbreaking new Aurora | 360 tour is the ultimate way to experience them. On board a private charter jet, you'll have the best access possible for seeing the Northern Lights.

To see the Northern Lights is an amazing moment in all situations, but to capture them well on camera adds exponentially to the experience. The photography services for the Aurora | 360 Experience will once again be led by an award-winning Canadian photographer. Hence, you will witness and record colourful apparitions that will become treasured memories! At 36,000 ft. above sea level, traveling at speeds of up to 500 miles per hour, and following a custom flight path, determined by our science team to optimize Aurora viewing potential, your on-board-experience cannot be more unique.

The **Aurora | 360 Experience** includes: various pre and post flight activities, Yukon inspired meals, a full evening of Yukon First Nations stories, dance and **culture**, along with an evening in the company of very special **science** guest-speakers welcomed from organizations such as NOAA, and the RASC. In addition, the **nature** day showcases Yukon's unique land, water and sky. "Aurora | 360 Experience highlights the colors of the Yukon through the celebration of Science, Culture and Nature."
